The Honourable Minister
Ministry of Energy and Green Transition
P.O. Box SD 40, Stadium, Accra
Digital Address: GA-107-2970

Dear Honorable Minister,

Notification of Incorporation and Operationalisation of PTEL Ltd.

We respectfully write to notify the Ministry of Energy and Green Transition that a joint venture company (JVC) has been formed to commercialise Electricity Company of Ghana's fibre-optic assets and pole usage rights for telecommunication purposes. The JVC, known as PTEL Ltd., has been duly incorporated under the laws of the Republic of Ghana and is jointly owned by Power Telco Business Ltd (PTBL) — a wholly-owned subsidiary of the Electricity Company of Ghana (ECG) — and C&W Telecom Limited (C&W) — a wholly-owned subsidiary of Vobiss Solutions Limited (VOBISS).

PTBL was established and incorporated as ECG's asset holding company for the incorporation of JVC, PTEL Ltd.

PTEL has been established to develop, operate, and commercialise open-access aerial fibre-optic and related telecommunications infrastructure using ECG's distribution network, in full compliance with energy-sector safety standards and national connectivity objectives. The joint venture represents a strategic continuation of a long-standing collaboration between ECG and Vobiss, leveraging electricity infrastructure for broadband expansion across Ghana.

PTEL's establishment directly complements the Government's Green Transition and Digitalisation Agenda by optimising the use of existing electricity infrastructure for telecommunications deployment. This model minimises environmental impact, accelerates broadband penetration, and supports inclusive socio-economic growth through sustainable digital access.

Purpose of this Notification

1. To formally notify the Ministry of Energy and Green Transition of the incorporation and operationalisation of PTEL, jointly owned by PTBL and C&W.
2. To request the Ministry's kind facilitation of introductions to the State Interests and Governance Authority (SIGA) and the Ministry of Communication, Digital Technology and Innovations for policy alignment, shareholder coordination, and regulatory collaboration in support of PTEL's national rollout.

Key Particulars of PTEL

- Registered Name: PTEL Limited
- Nature of Business: Wholesale open-access telecommunications-infrastructure company
- Shareholders:
  – Power Telco Business Ltd (Subsidiary of ECG) – 40 %
  – C&W Telecom Ltd (Subsidiary of Vobiss Solutions Ltd) – 60 %
- Registered Office: No. 27 Abokobi Close, Cantonments, Accra

- Scope of Operations: Nationwide aerial-fibre and telecommunications-infrastructure deployment leveraging ECG poles and substations, in compliance with energy-sector safety regulations.
- Client Base: Existing MNOs and ISPs formerly managed by Vobiss, now transitioned to PTEL under a unified contractual and service framework.

Background

A. By an Agreement dated 8 June 2012 (the *"Principal Agreement"*), ECG granted VOBISS the rights to use ECG's distribution infrastructure for the delivery of a high-speed aerial fibre-optic telecommunications network for a term of five (5) years, renewable for a further term.

B. The Parties subsequently executed Amendment No. 1 dated 10 December 2012 (*"Addendum 1"*) and a Renewal Agreement dated 21 July 2017 for an additional five-year term with renewal rights.

C. Under these Agreements, the Parties were required to agree on the framework for the commercialisation of VOBISS's aerial fibre-optic network.

D. In January 2017, VOBISS entered into agreements with MTN Ghana and C-Squared for a Proof of Concept (PoC) to deploy Fibre-to-the-Home (FTTH) and Metro Networks on ECG's Low-Voltage (LV) and Medium-Voltage (MV) overhead infrastructure.

E. Pursuant to these Agreements, VOBISS deployed over 3,000 km of fibre-optic cables on ECG's distribution infrastructure, from which both Parties agreed to share profits.

F. Upon expiry of the Renewal Agreement in 2022, the Parties resolved to continue operations through a wholesale telecommunications company — the Joint Venture Company (PTEL) — to deploy, operate, and manage aerial fibre and related telecommunications infrastructure using ECG's assets and the Parties' combined networks.

G. To operationalise this structure, Power Telco Business Ltd (PTBL) was incorporated by ECG and C&W Telecom Ltd (C&W) by VOBISS, which now jointly own PTEL with equity participation of 40 % (ECG) and 60 % (VOBISS).

H. As part of the Joint Venture's transition framework, all existing Mobile Network Operator (MNO) and Internet Service Provider (ISP) clients previously under Vobiss' management have been transferred to PTEL, ensuring business continuity, unified service delivery, and consolidated reporting under the new entity.

I. PTEL is also engaging with the National Communications Authority (NCA) to ensure full compliance with all telecommunications licensing and operational requirements.

We remain grateful for your leadership and guidance and look forward to the Ministry's continued support as we implement this strategic energy–telecommunications partnership in alignment with Ghana's Green Transition and Digitalisation Agenda.

Yours faithfully,

Kwame Kpekpena
Ag. Managing Director
